# Unplug'd screen mirroring software

Create collaborative and one-to-one learning from the front row to the last—simply and easily. Stream up to nine student devices on the ProColor display or bring the display to individual devices. Now learning has no boundaries!

Boxlight's Unplug'd screen mirroring software allows mobile devices or laptops enabled with the Unplug'd app to stream content to the ProColor interactive display. Create greater collaborative and cooperative learning while gaining more in-depth understanding of the students' comprehension. Plus, students can learn from one another and are more engaged.

The Unplug'd screen mirroring software's broadcast feature puts the content right on the student's device, allowing students to practically hold the front-of-the-room display in their own hands.

- Stream any combination of up to nine mobile devices, tablets, laptops, and even Chromebooks on the ProColor flat panel display.

- Unplug'd software has easy-to-use features, putting the teacher in control of what is viewed, shared, and enhanced with full-screen viewing.

- Intuitive design automatically adjusts for the number of devices being displayed at the front of the classroom.

- Unplug'd screen mirroring software is extremely responsive with almost no lag time.

THE UNPLUG'D SYSTEM

- The Unplug'd software comes pre-installed on the embedded Android in the ProColor displays.

- The app needs to be installed and running on all active student and teacher devices.
